Were The Apollo Missions Faked?

Is it really possible that men landed on the moon in flimsy metal capsules, drifted through lethal radiation belts without harm and found their way using computers no more powerful than a present-day laptop? And why did NASA fake hundreds of photos and miles of film allegedly taken on the lunar surface? Did deep space travel turn out to be so dangerous that NASA faked the Apollo 13 disaster to stop the program? This compelling video throws into serious doubt the authenticity of the Apollo missions and features explosive information that challenges the declared abilities of NASA to successfully send a man to the moon and return him safely to Earth. Supported by analysis and testimony of experts in several disciplines, this two videotape set examines questionable still photographs and TV coverage, investigates the dangers of radiation during deep space travel and confronts the very real problems of building safe, reliable rockets. Is money the only reason we stopped trying to reach the moon? Watch this stunning 222 minute video and decide for yourself. See video policy on order form.

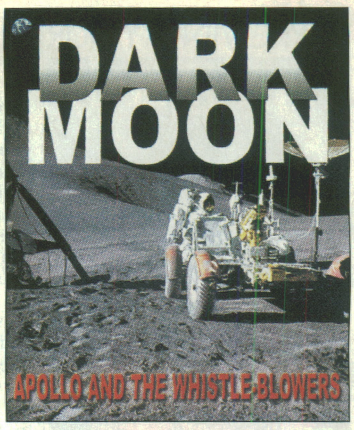
The Secret History Of The Apollo Space Program



When British researchers began investigating the possibility that NASA had faked some of the photos supposedly taken by the Apollo astronauts on the Moon, little did they know that the answer to that question would lead them to literally hundreds of other discrepancies in the official record. By the time they were done, they had the disturbing answers to dozens of questions: Why NASA faked the Apollo record. Why Neil Armstrong wasn't the first man on the Moon. Why a Soviet spacecraft was launched at the same time as the Apollo 11 Moon mission. Why the "live" TV from the Moon was actually videotape playbacks. Why photos and film allegedly taken on the Moon had to have been made on Earth. Why the Soviets and Americans joined forces on a secret mission to the Moon. Why the Apollo 13 "accident" was actually a planned space rescue drill. And, most chilling of all, you'll learn the real reason the military and politicians wanted to reach the Moon. A must-read for anyone interested in the exploration of space, government cover-ups and the search for truth. 568 pages.

Mind Control Secrets

Learn the horrifying secrets behind government and criminal campaigns to control the behavior of ordinary citizens. Governments have long practiced behavior modification with drugs, hypnosis, ELF waves and radio implants placed in the brains of "dissidents." Now, anyone with the technical know-how can subliminally place thoughts in people's minds to control their actions, even utilizing telephones to dial-up coded messages. The author, a former military intelligence officer, documents the long history of experiments to use drugs to break down the will to resist, use hypnosis for creating multiple personalities and de-sensitizing people to violence, building psychotronic generators to cause disorientation and implants to control behavior, and using microwaves to create "voices" in the head with hidden commands. He also presents evidence that terrorists, criminal organizations, individual sociopaths and even extra-terrestrials use mind control technologies to harass and torture people indiscriminately. Killer Instinct Self-Defense

"If you see one training tape in your entire life, THIS is the one to see!"

Most of us hate to fight. The idea of trading blows with some stranger (who might have the skills to rip my head off) does not appeal to me in the least. **But we *have* to know how to WIN a fight---even against a trained killer.** It's our duty as protectors of the people who depend on us. **So when Demi Barbito's name kept coming up in conversations with cops and streetfighters, I started paying attention.** Most of his clientele are SWAT cops, Drug Enforcement agents & maximum security prison guards. These men are the best-trained professionals in the world...men who must hunt & fight with trained killers who love to maim. **So what's Demi got that's so special?** He teaches a unique blend of "self-preservation" along with the most vicious "killer instinct" you've ever experienced. **It's the most delicate "balance" you could ever have--the complete, cold-blooded skill to end *any* fight in seconds...along with the crucial sense to protect yourself from *any* harm.** Demi also knows that unless you train during your own adrenaline dump...you are likely to panic in a real fight! **So he developed the only "Real Emotions" training methods I've ever seen.** What you feel during this training is *exactly* what you will feel during an actual fight--the emotions, the dizzying rush of adrenaline, the urge to run or kill that everyone goes through in the clutch. This is priceless training...and with it you'll never experience the dreaded "deer in the headlights" panic MOST guys suffer when the fight starts **Plus, he *doesn't* train you in "techniques," which can take forever to learn.** That's why men with almost no time to train love Demi--there are *no* complex moves, *no* memorization nonsense, *no* stiff training exercises. That's why he's so *popular* with cops, prison guards & soldiers. Guys who don't have time to train...but want the best fighting skills available. Because their *lives* depend on it. **You get the best training in hand-to-hand combat, groundfighting, improvised weapons, knifes & tactical gun handling.** I realize that it seems a little unbelievable that you can learn everything so quickly...but it's true. It's all about knowing how to be a good human being...who just happens to also know how to call up that "killer instinct" on a moment's notice. ***And take care of business.*** 3 video set, 157 min. Learn To Fight Like A "Hot Action" SWAT Cop

You don't need to be strong, or agile, or even in top shape to use this stuff with incredible effectiveness. A lot of cops don't stay in good shape, and they have even less time than you do to train. Yet they need to be able to EXPLODE with life-saving skill in the blink of an eye. **Mike Gillette is the "deep" insider that civilians never get to see.** His instructor credentials include SWAT cops, Rangers, Marines and the U. S. Marshalls. The pickiest services in the military and law enforcement choose the "little guy" (5'9" tall, just over 150 pounds in all his SWAT gear). Why? Because, after a lifetime of studying combat, and fighting drug-crazed criminals as a cop, Mike developed an amazingly tight "real world" package of NEW "aggressive self-defense" skills that go beyond simple martial arts. **Skills so easy, you can learn them in a single lesson.** After you've been exposed to Gillette's "cop level" teaching, you'll be able to hold your own in ANY street situation. With total confidence. Because you've learn to fight like a veteran **SWAT** cop. These are the kind of street survival skills that will make criminals back away from you in fear. Instant action that demands respect and submission. It's how reputations are made. **The only way to get this training would be to join an elite police or military unit.** But in this video version, you get the SAME training Gillette's methlab-busters get. Cops have to be able to fight every kind of burly, jail-hardened criminal. And win every time---no cop can afford to get knocked unconscious in a fight, because against this kind of scum, he'll never wake up. You could face the same kind of sleazoids in the street, at any time. You need the same **dominant skills**. 2 video set, 115 min. See video policy on order form.

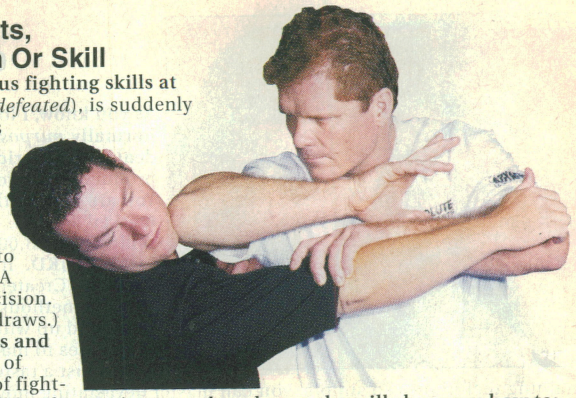
Instantly Dominate Even Experienced Opponents, No Matter How Over-Matched You Are In Size, Strength Or Skill



Best part: You can learn it almost overnight, even if you're out of shape & have no previous fighting skills at all...*guaranteed!* Out of nowhere, Tom Proctor (unassuming, mild-mannered, age 45 & *undefeated*), is suddenly known as the fighter no black belt will fight anymore. Every opponent he faced in no-rules cage fighting outweighed him by 40 to 120 pounds, was taller by up to 8" and all were young studs in their twenties. They licked their chops...but Tom put them (17) ***all*** down. **FAST.** But, he didn't do it for the money. He just wanted to let the world know there really is a simple fighting system for average guys. **And NO ONE can beat it!** Tom didn't stop with his own victories. He took a group of guys off the street, most with zero fighting experience. He used his teaching secrets to "force-feed" his simple, basic fighting skills into this motley group, then sent them into the cages for the first fights of their lives. Results? A total of 68 no-rules cage bouts with 64 wins by knockout or submission and 4 losses by decision. (None of his guys has ever been knocked out or even hurt---the "decisions" were actually draws.) **It's his mission to completely erase all the advantages that big, muscular muggers, rapists and punks have against normal guys (and girls).** There is no intense training, no long months of practice. The few skills you learn (quickly) easily adapt to any situation, against any type of fighter. It doesn't matter what kind of shape you're in. Tom doesn't care what your current skill level is. **In just one short lesson, he will show you how to:** immediately pump 400% more raw power into every blow; create a protective shield that will NOT ALLOW any attacker to come close to striking you; quickly make a strong opponent weak; tap your hidden strength to fill you with the confidence of a true warrior; knock down a skilled attacker & finish him off in seconds. **It's like being your own 300-pound bodyguard.** This is a once-in-a-lifetime opportunity to learn how to defend yourself anywhere, under any circumstances. 2 video set, 120 min. CATALOG EXCLUSIVE!

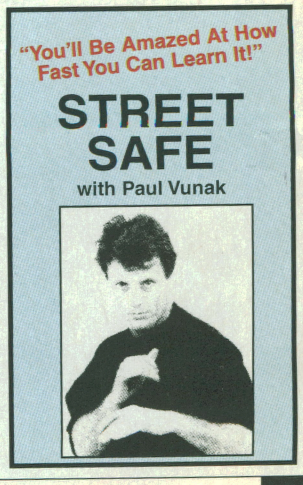
Top Secret Hand-To-Hand Fighting System Finally Released To Limited Number Of Civilians!



Now you can easily "take down" trained boxers, Karate black belt masters & street thugs twice your size...even if you've never been in a real fight before in your life! Wouldn't you like to have the confidence in knowing without question that you can "neutralize" the threat of physical assault by criminal scum as easily as you would squash a fly? You've never heard about Paul Vunak, but the SEALs, FBI, CIA & a dozen police SWAT teams have. The U.S. Navy SEALS brought him in to teach his unique system after an exhaustive worldwide search for the best hand-to-hand combat system in existence. The SEALs aren't interested in learning complicated martial arts like Karate or Tae Kwon Do. All that fancy kicking & hacking may look scary, but it doesn't work on the battlefield...or in the street. Paul followed only one rule when choosing the moves he would use in his simplified hand-to-hand system: **It had to work 100% of the time in street fights...where there are no rules.** As a result, there are only 8 moves total. All of them are unbelievably effective, & all can be learned & mastered in only a matter of hours. You don't have to be quick, or coordinated, or even in decent physical shape. You don't need to train constantly to become a master. Women, grandmothers, even children have learned it. A thousand guys smaller & weaker than you have learned it, too. Almost overnight. You'll feel confident using Paul's system even after a single lesson. This video is all you'll need & should be the most intense & enlightening hour you'll spend in front of a T.V.! Everything is broken down into its most easily-learned form. **In fact, you'll have enough powerful know-how after just one viewing to increase your natural fighting ability by 200%...instantly!** Paul even took the time to show you real-life examples in order to remove any doubt you may have as to how to use your new skill in the real world. Isn't it time to really know how to protect yourself so you can walk the streets with confidence? 55 min. See video policy on order blank.
